Comment

I have two words for you, a name actually, Isaac Asimov. I also have a suggestion for those receiving these comments. Start devouring AI related science fiction literature. 2 things currently terrify me. 1 is this summer, because this winter has been practically non-existent. 2 is the uncontrolled rise of AI. This goes to the very heart of Pandora's Box. You MUST, at the very least, air gap these machines and DO NOT let them connect to the internet. One only has to look at the effects of constant internet content consumption on the younger generation to see the potential ramifications of allowing an intelligence to learn unhindered by whatever methods available. I understand that we, these United States, want the potential advantages from being first to develop/deploy a "helpful AI". The problem is, there is zero evidence to suggest that an AI, self-taught by a respective country's system, would in fact be "helpful". To me at least, an uncontrolled AI is nothing better than the
