Comment

There should be a mandatory requirement of disclosure of data inputs - as well as training methods (To ensure compliance with future proofed regulations) - that go into training foundational models that generative AI requires for generating their outputs. As well as expedient mechanisms to query and search for if personal or copyrighted data has been used in training said foundational models. Not only is this to ensure transparency, it is also to ensure compliance with government regulatory standards and other laws, such as copyright and privacy. (See emad-firewalls.png as evidence of Emad Mostaque, the founder of StabilityAI, openly bragging about violating privacy.)

This will also ensure that no unreasonable and onerous burdens are placed upon the authors of the data inputs that are used in training said foundational models, if there are any claims of copyright infringement - whether bona fide or frivolous - such questions can be resolved very expediently and quickly with ve
