Comment

As a concerned citizen and supporter of government regulation, I would like to express my apprehensions about the proposed legislation to regulate artificial intelligence (AI). While I appreciate the government's role in ensuring the safety and ethical use of AI, I am deeply concerned about the potential consequences of ill-informed regulation in this rapidly evolving field.

My concerns stem from a lack of confidence in the government's current understanding and expertise in AI. The recent hearings with TikTok served as a prime example of how unequipped our representatives are to tackle complex technology issues. Given the highly specialized nature of AI, I worry that the government may inadvertently enact regulations that put the United States at a competitive disadvantage on the global stage. As countries around the world invest in and advance AI technology, it is crucial for the US to remain a leader in this field.

Misguided regulation in the AI industry can not only stifl
