Comment

To whom it may concern at the NTIA,

I am writing to you today about your call for comments on AI Accountability. I am concerned that generative AI products (ChatGPT, Midjourney, Stable Diffusion, OpenAI and many more) are ruining the livelihoods of the creators they stole from, and I am calling for massive and clear regulation in favor of these creators.

1. The development of generative AI STARTS with grand scale theft of data, which should always be considered the intellectual property of its creators. Writing, art, music, and photography are treated like free resources to train AI on, and later turned against their original owners in the marketplace. This is a loss of profit for the creator and is a process lacking any semblance of explicit consent. In any other case where writing, art, and music is used as part of such a large-scale product, there would be licensing, payment, agreements. All of that is lost with generative AI.
2. In some cases, opt-out is being offered by
