Comment

While AI can be used as a tool to supplement art and the creation of literature and two-dimensional images, the usage of this software must be regulated. Currently, there are many private companies who are looking to use AI as a replacement for human creativity and to replace jobs. This would negatively impact the entertainment industry on all levels. Writing is the first step in creating any book, TV show, or movie. There are certain aspects of the writing process that can only be tweaked and adjusted by humans. AI does not have the ability to correct itself, it only pulls from a database of collected information to create what you request. This would cause unemployment rates to increase, as writers would be unable to find jobs.

When it comes to artwork, AI is also increasing in popularity. People online are passing off their AI creations as artwork that they took the time to create. This is very deceitful. Artwork made by humans requires knowing at least basic concepts of co
