Comment

As Ai technology is currently being developed, I find this technology, not only problematic for people who want to keep their rights to their own intellectual and creative property, but also people who have personal data which should not be used for tech such as this.

Ai technology has already proven to be quite unethical and exploitive to people who work in creative industries like illustration, filming, or writing as well as people who working in more technical industries like programming and software engineering. I believe there needs to be serious consideration for protecting peoples personal data or intellectual property from being used in ways that they do not approve of, especially if it is done without their explicit consent or knowledge. I suggest that the people who own this data and digital property should be the ones who get a say in how their data is used and should be the ones helping to guide law makers and regulators on what laws need to be made to protect the
