Comment

Regarding AI audits, we would like to reaffirm what many audit academics, such as Abeba Birhane and Margaret Mitchell, have recommended for a while now:

Have companies disclose all ML training data scraped from the internet, or otherwise, that is copyrighted by other persons.

The EU has taken the lead on mandating that all copyrighted data used to train ML models should be disclosed.

Please follow best practices in your policies by mandating the disclosure of all copyrighted data used for training.
