Comment

Chris Riley and Susan Ness, distinguished fellows at the University of Pennsylvania's Annenberg Public Policy Center, thank NTIA for this public consultation. We urge NTIA to embrace modularity as a co-regulatory governance framework for fostering a trustworthy AI accountability ecosystem while enabling democracies to better align by sharing common mechanisms, protocols, standards, and oversight regimes.

Modularity is a governance approach that centers on multistakeholder-formed bodies to design and undertake operational and technical functions common across multiple jurisdictions, despite different legal systems and regulatory frameworks. Governments would recognize the modules as substantially fulfilling duties or requirements under their respective digital regulations. Enforcement would remain with government. Multistakeholder systems can be updated more efficiently than government to keep pace with an evolving ecosystem.

It is both timely and time-sensitive for the U.S. t
